Remise a zero moteurs.vi

Error In
<B>error in</B> can accept error information wired from VIs previously called. Use this information to decide if any functionality should be bypassed in the event of errors from other VIs.

Right-click the <B>error in</B> control on the front panel and select <B>Explain Error</B> or <B>Explain Warning</B> from the shortcut menu for more information about the error.

- **status**
- **code**
- **source**

Error Out
<B>error out</B> passes error or warning information out of a VI to be used by other VIs.

Right-click the <B>error out</B> indicator on the front panel and select <B>Explain Error</B> or <B>Explain Warning</B> from the shortcut menu for more information about the error.

- **status**
- **code**
- **source**
