Stop

error out final

<B>error out</B> contains error information. This output provides standard error out functionality.

status

<B>status</B> is TRUE (X) if an error occurred or FALSE (checkmark) to indicate a warning or that no error occurred.

code

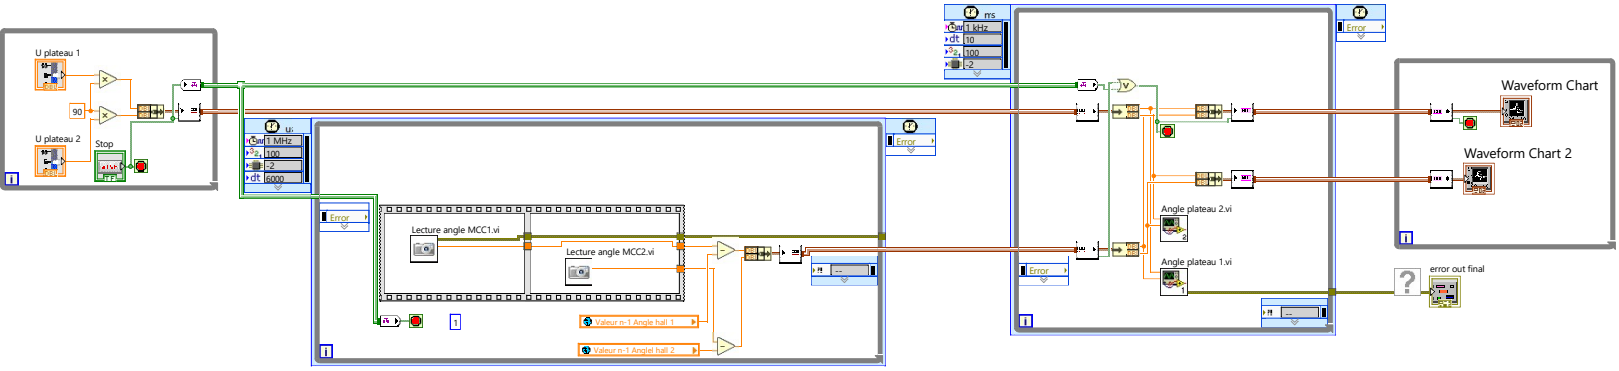

<B>code</B> is the error or warning code.

source

<B>source</B> describes the origin of the error or warning and is, in most cases, the name of the node that produced the error or warning.
