VI Moteur CC v2.vi

Constante de temps moteur 2

Consigne

Derivative Time (Td)
<B>Derivative Gain (Kd)</B> is the controller parameter that adjusts the effect of the error derivative term sE(s) on the controller output U(s).

Integral Time (Ti)
<B>Integral Gain (Ki)</B> is the controller parameter that adjusts the effect of the error integral term E(s)/s on the controller output U(s).

Proportional Gain (Kp)
<B>Proportional Gain (Kc)</B> represents the proportional gain of the controller.

Discrete Step Size (s)

Theta Plateau (rd)
